

SUMMARY ROLE FOR:

The team leader

A team leader play a critical role in ensuring that project successfully completed on time, within the scope and with high quality. They at as a bridge between management and developing team, guiding both technical and human aspect of project. Their responsibility go beyond coding, they include leadership communication, planning and solving problems. Another major role of a team is coordinating and planning. The team leader works with the stakeholders such as project manager and clients to understand project gaols. They help to break down the requirement into smaller, manageable task and assign them to meat members based on their skills and strengths. The also ensure that timelines are realistic and that the team follow a clear development schedule, often using methodologies like agile or Scrum.

There is also another responsibility which is technical guidance and decision making. The team leader usually an experienced developer who provide direction on coding standards, tools framework and system architecture. They help the team solve technical problems and make important decision that affect the overall system design. When team members faces challenges, team leader offers supports and ensure that the best practise are followed and maintained coding quality and efficiency.

Communication is very key since the team leader act as a link between the development team and other shareholders including client, design and upper management. They ensue that everyone is informed about project aligned with the gaols. Team leader also conduct regular meeting, such as stand up or progress review to keep everyone on track. A team leader is responsible for monitoring progress performance. They track the progress of task and ensure deadline is met. If delays and issues arise, the team leader identifies the cause and take corrective action. This may involve reallocating resource, adjusting timeline they also ensure that the final product meet quality standers through testing and code viewing.
